

The Simulator of the future

- IADC/IWCF approved
- Zero hardware required
- AI instructor to teach & assess
- Lowest cost in the industry

An AI Instructor for every student in your class

Preview simulation exercises before class to increase pass rates

Any purchase of a simulator for classroom use includes access to the simulator for students before class. Students can practice simulation exercises on their own iPhones, iPads, or computers before class.

Students get unlimited simulator practice before class to increase pass rates on the WellSharp exam.

An **AI instructor** lets the student practice at their own pace, with smart hints & guidance.

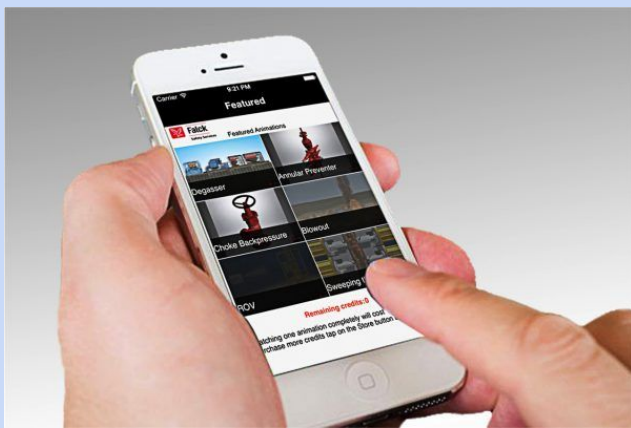

Practice simulation as much as you want during class

During class, every student can download the simulator on their smartphone or tablet for unlimited simulator practice time with our **AI instructor**.

Give every student access to the simulator to simulate and follow along as you teach kill methods and kick detection to the class.

Refresh simulation exercises in the field to stay competent

After class, let every student practice simulation exercises on their own devices. Student can practice to retain class knowledge and be prepared for any well control situation in the field.

An **AI Instructor** keeps track of student competencies through automated assessment.
