

International Association of Drilling Contractors

Cybersecurity Committee Meeting
15 Dec 2020
Houston, TX
3657 Briarpark Dr #200 77042

Minutes

- ❖ Introductions
- ❖ Committee Administration
 - **Introduction of new Co-Vice Chair Jennifer Hohman. Welcome!**
- ❖ Mission, Goals and Objectives
- ❖ Antitrust guidelines
- ❖ Meeting Minutes review –
 - Guidelines collaboration on MS Teams Cybersecurity Committee Org.
 - Co-Chair Role is now filled. Action completed!
 - ART Committee collaboration with Cybersecurity Committee.
 - **Chris Dewitt** – action to follow up with Joe Weiss – sensor level cyber perspective for ART Sensor Stewardship. Action not completed.
- ❖ Notable Events
 - Ransomware attack on hospital causes patient to die.
 - Do we have systems like this that may not be “OT” but still vital to safety of rig personnel?
 - SolarWinds compromise leading to Fire Eye supply chain attack.
 - Lots of good conversation on the more rapid response to this threat, identifying the affected resources much more quickly than in the past.
 - To connect or not to connect? Good conversation here.
- ❖ Bowtie Risk Analysis
 - Discussion around the IMO 2021 cybersecurity requirements and how to risk assess to show compliance.
 - Lots of good discussion from the committee members. Our hope is that we can collaborate as a group to find a more optimal risk communications method that will raise the standards of all of our orgs and allow better communications between cyber stakeholders (technical and not).
 - **Oren** – Create channel in Teams for “Risk Management” to continue this conversation after the meeting.
 - **Everyone** – Join the IADC Cybersecurity Committee MS Teams Org! Juan has the info to join.
- ❖ Guideline Development

International Association of Drilling Contractors

- Juan asked that members join the MS Teams org and contribute to the conversation.
- **Juan** – mentioned putting firm dates on various components of the Guidelines starting with the Executive Summary. He has posted a draft Executive Summary on Teams. Go there and let us know what you think.
- How will this influence the rest of the supply chain, vendors, etc.
 - Why can't vendors be more cyber secure? "why does it take a million bucks and a shipyard to upgrade / patch?"
 - Weatherford commented on why this makes the Guidelines more important, so they know how much protection to add. This creates a fair marketplace for vendors to compete.
- ❖ Upcoming activities
 - **Jim** – needs 2021 goals for the committee by 25 Jan 2021.
 - **Jim** – Next Meeting - 10 Feb tentative date for next meeting.
 - **Juan** – Subcommittee for drilling contractors only?
 - **Cybersecurity Conference?** Would this be of value for the committee members?
 - **Jim** – Would you want to join forces with another O&G or maritime Cyber conference?
