

Connecting the Energy Future™

OIL STATES SYSTEMS & TECHNOLOGIES

Together we advance the future of energy with...

Enabling Technology

- for Streamlined Drilling, Completions & Workover Operations & Performance**
- for Next-Generation Energy Infrastructure**
- for Renewables for Alternative Energies including Offshore Wind and Deepsea Minerals**
- and for Advanced Military and Industrial Applications.**

Oil States Industries, a subsidiary of Oil States International (NYSE: OIS), is a technology company that is advancing the future of energy today. We partner with you to bridge gaps in the industry with enabling technology and to deliver next generation energy infrastructure.

We rise to the challenge to meet growing global energy demand through traditional sources while also identifying pathways to a lower-carbon, multi-source energy system with our solutions for deepsea minerals gathering, offshore wind, geothermal, wave and tidal energy. We also offer advanced solutions for military & industrial performance.

Our innovative equipment, systems and services enable transformation in the industries we serve, providing game-changing new approaches from concept to delivery. We support our customers globally with best-in-class service and support...24/7 around the clock, around the world.

OIL STATES SYSTEMS & TECHNOLOGIES

Lifting, Handling & Production Systems

Ensuring Consistently Reliable Production

Oil States is a reliable partner for project-specific floating and fixed production solutions. For integrated solutions topside to subsea, our innovative systems are designed for seamless installation and longevity.

- Marine Cranes and Deck Equipment (AHC, cranes, winches and mooring solutions)
- TLP Tendon Equipment
- Riser Systems and Flexjoint™ Steel Catenary Riser (SCR) Technology (for TLP's, FPSO's and more)
- Advanced Welding Technology, Consulting and Services
- Riser Receptacles and Pull-in Equipment
- Fixed Platform Flotation, Grouting and Leveling Solutions
- Fixed and Floating Offshore Wind Foundation & Mooring Systems
- Decommissioning - Structural Removal Services (for platform and pipeline removal)
- Precision Machining and Cladding Services

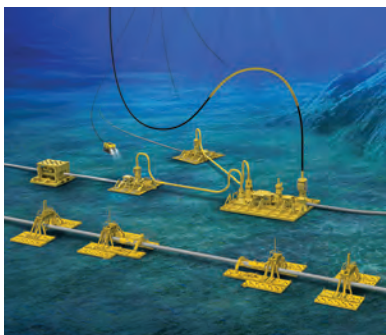

Riser Systems, Recertification & Casing Solutions

Solutions for the Entire Well Lifecycle

Oil States delivers innovative, reliable equipment and services that minimize downtime and support safe, cost-effective drilling operations. We are known for systems and solutions for the entire well lifecycle, from drilling to decommissioning and now complete riser packages.

- Global Riser Analysis and Structural Testing Services
- Complete Riser Systems for Drilling, Completion/Workover and Production
- Managed Pressure Drilling Solutions
- Global Riser Recertification and Asset Integrity Management Programs
- Offshore and Onshore Riser Inspection Services
- Riser Joint, Wellhead, High-angle Release and Flexjoint™ Connectors
- Well Abandonment Services

Subsea Pipeline & Production Riser Systems

Connecting Your Assets to Market

For new construction or repair, subsea to surface, deepwater to host facility or host facility to shore, Oil States provides reliable pipeline systems and solutions to keep you online.

- Shallow Water Pipeline Systems & Repair Solutions
- Deepwater Pipeline Systems and Repair Solutions
- Valve Products and Services
- Customized Solutions for New-build, Intervention & Repair
- Precision Machining and Cladding

Onshore & Downhole Technologies

Reliable Solutions for Critical Applications

Oil States well servicing products enable customers to increase productivity and to optimize flow and maximize production from both declining and high-performing wells. Our elastomeric and composite molding design and manufacturing expertise along with materials testing capabilities enable us to solve unique challenges for our customers. Bring us your most complex parts and we will work with you to develop a customized plan to optimize sourcing. We also provide key technologies for diverse industrial applications.

- Onshore Well Servicing Products
- Perforating & Completions Technology
- Valve Products and Services
- Elastomeric and Composite Custom Molding Services
- Industrial Clutches and Brakes

Services

We Work Where You Work, Around the World, Around the Clock

Everywhere our customers operate, we provide services and support across a full spectrum of Oil States technologies. From fabrication to customized testing services, we work collaboratively and as an extension of your team to deliver customer-focused, high quality service and seamless project execution. We are your more responsive, more flexible, global partner. Offering the following specialized services:

- RiserTec™ Engineering Design Consultancy
- Precision Machining and Cladding
- Fabrication
- Inspection, Repair and Maintenance
- Offshore Riser Inspection
- Enform™ Casing Integrity & Clad Solutions
- Custom Molding
- Specialized Testing
- Rental Equipment
- Decommissioning/P&A

WE BRIDGE INDUSTRY GAPS

Built upon quality, field-proven components, today Oil States has transitioned to become a truly global OEM able to supply complete integrated systems and solutions. Our approach, our technology and our best-in-class service define who we are.

We develop a deep understanding of customer challenges and requirements and as a more flexible and responsive supplier, rapidly translate those needs into customer-focused engineered solutions. We partner with our customers through the complete concept-to-delivery cycle on high-tech solutions by providing best-in-class innovation, support and value.

Our innovation and technology bridges gaps in the industry with game-changing new approaches. These technologies enable our customers to streamline operations, to build better fields and to optimize capital & maintenance expenditures - improving their capital allocation and returns.

Each solution is underpinned by Oil States industry-leading quality and best-in-class service - it's the Oil States standard.

ABOUT OIL STATES INDUSTRIES

Oil States Industries, a subsidiary of Oil States International (NYSE:OIS), is a technology company and an industry-leading supplier of innovative equipment, systems and services that evolves along with the needs of our customers by providing enabling technology in energy, industrial and military markets. Oil States is headquartered in Arlington, Texas with locations in 14 countries and more than 1700 employees. Additional information is available at oilstates.com.
